

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

INTRODUCTION.

TO BE ATTENTIVELY READ BEFORE YOU BEGIN TO USE THE BOOK.

IN this DICTIONARY, as in all the other books which have come forth from under my hands, I have endeavoured to make the matter as clear as possible ; that being, in my opinion, the first quality in literary works of all sorts, seeing that it is of no use to write, unless that which you write be understood ; and seeing that the less trouble the reader has to get at your meaning, the more likely he is to get at it, and, of course, the more likely he is to profit from your labours.

I have not made a book for literary men ; for persons curious with regard to the origin of words, or with regard to great niceties in the use of them ; but, for persons who want to get at a competent knowledge of the meaning of words, and of that word, in one of these languages, which amounts to the same meaning in the other language ; and this end I have endeavoured to enable the reader to accomplish with as little trouble as possible ; avoiding all those superfluities which only serve to waste time and to arrest the attention of the reader on matters foreign to the pursuit in which he is, at the moment, engaged.

A Dictionary, abounding with etymological curiosities, with examples of the uses of words, with quotations from authors, and with minute peculiarities as to idioms, is, indeed, not only a curious, but an *amusing* book : but, it is not an *amusing* book that we want here ; it is a book of *use*, and, if it contain any thing to divert us from that *use*, it does us harm ; it wastes our time, and withdraws our minds from the objects immediately before us. This has happened to me a thousand times, I dare say. Having looked for my word, I have found such a fund of amusement growing out of it, that, if I were translating, for instance, I have not only wasted my time, but have returned to my dull work, if not with absolute reluctance, at least with the want of the full force of those ideas with which I had quitted it. If my reference to the Dictionary had given me only the word I wanted and its full meaning, or meanings, without any amusement, my time would have been saved and the spirit of my labours would have been unblunted. It is this experience that has been my guide in regard to the compilation of this book. As in my English Grammar and in my French and English Grammars, so in this Dictionary, I have endeavoured to prevent others from experiencing the loss of time and the inconveniences that I myself have had to encounter and overcome. And, were it only from the following circumstances, I should think that I had succeeded : no people have to resort to Dictionaries so *often* as PRINTERS, and to no people can *accuracy*, combined with *saving of time*, be of more importance ; and my printers tell me, that this is “ the most **HANDY** Dictionary that they have ever seen ; ” a character of it which I should prefer before an eulogium from all the reviewers in the world united.

There are two descriptions of persons who stand in need of a Dictionary ; namely, those who have *learned grammar thoroughly* ; and those *who have not*. To the former the TABLES prefixed to the Dictionary will not be necessary ; but, to the latter, especially when they have to *write*, or to *speak*, in either of the languages, these TABLES are absolutely necessary ; and, if they be diligently attended to, they will, of themselves, very soon enable any learner of common capacity to overcome some of the greatest of those difficulties which English people meet with in the learning of French ; as will clearly appear, when I have described the contents and the uses of these TABLES, which are six in number, as follow :

TABLE I. contains an explanation of all the ABBREVIATIONS, used in both PARTS of the Dictionary, ranged in *alphabetical order* ; so that if the reader meet with an abbreviation, the meaning of which he does not understand, he has only to turn to this *table*, where he will find the explanation in the alphabetical place of the abbreviation itself, and directly opposite that abbreviation. For instance ; in the Dictionary, after the word ABJECT, you find *adj.* ; and opposite the abbreviation, *adj.*, in the TABLE, you find *adjective* ; so that you thus know, that ABJECT is an *adjective*. So on with regard to the other abbreviations ; and, with regard to the whole of them, a very short time, with due attention, will make you so familiar, that you will have no further need of referring to the TABLE.

TABLE II. relates to the PLURALS of FRENCH NOUNS. It is preceded by the RULES (*three* in number) for forming the *plural numbers* of French nouns. As to the GENDERS of French nouns, those are fully indicated in the Dictionary itself. This TABLE relates solely to the forming of the PLURAL NUMBERS. First come the THREE RULES, and then follows an *alphabetical list* of such nouns as depart from those rules. Let us take, for instance, the noun TROU, which, according to the SECOND RULE, would, in the plural, be TROUX ; but it is not so ; it is *trous*, adding an *s*, like nouns coming under the FIRST RULE. The Dictionary gives you the word in the *singular number* only ; the SECOND RULE shows you, that the word TROU, being a noun ending with *ou*, would form its plural by adding an *x*, and not an *s*, to the singular ; but if you look into the LIST that follows in this TABLE, you will see that TROU, although it does end in *ou*, takes an *s*, and not an *x*. There are, as you will see, but *twenty-six* of these irregular nouns ; so that, with due attention to the table, you will have the whole of them familiar to your memory in a very short time ; for, the list being *alphabetical*, you will always find your word in a moment. Let us now follow the process all the way through. You are writing French, and, wanting to find the French word for HOLE, you look into the English part, you find the French word to be TROU ; but presently you want to write about two or more HOLES, and how are you to know how to form the plural of TROU ? Why, first look at the RULE, and that will tell you, that it must become TROUX, because it ends with *ou* ; but before you write, look at the list of exceptions, and there you will find that it must be TROUS. On following this practice for a little while, you will find that the whole matter will be safely lodged in your mind.

TABLE III. relates to the NUMBER and the GENDER of FRENCH ADJECTIVES. English adjectives never change their endings for the purpose of denoting either the number or the gender of the nouns to which they belong. Far different is it with regard to French adjectives : they have changes in their endings for the purpose of denoting both *number* and *gender* ; that is to say, the noun demands an adjective agreeing with it in number and in gender ; and the adjective must vary to accommodate itself to the number and gender

of its noun; thus, as to its number, *un bâton* BLANC (a white stick), *deux bâtons* BLANCS (two white sticks). Then, as to the gender; *une main* BLANCHE (a white hand), *deux mains* BLANCHES (two white hands). It is, therefore, a very important part of our affair to learn the rules for changing the endings of the adjectives for these purposes. The changes for the purposes of denoting the number are not, as will be seen, numerous, and do not give rise to rules of any difficulty; but, as this TABLE and its LIST will show, the *gender* of adjectives is a thing of very great importance, and must be strictly attended to. In other Dictionaries of the two languages, this object is attempted to be provided for by *abbreviations* placed against the adjectives themselves in their places in the Dictionary: but this has always appeared to me to be very clumsy work, causing a great waste of time; and, indeed, nine times out of ten, doing nothing but puzzle the learner, and tend to disgust him with his undertaking. Let us take an example. You want to use a French adjective to express the meaning of the English adjective, MALICIOUS; and the English part of Boyer's Dictionary (and of other Dictionaries) tells you that the French word is MALIN. Then, in looking at the French part, to see how this word changes to denote the feminine gender, you find "MAL-IN, IGNE." Now, though *I know* that the IN is to be added to the MAL to make the *masculine*, and that IGNE is to be added to the MAL to make the *feminine*, how are *you to know it*? Again, you want a French adjective to answer to our adjective RED, and you find it thus in the French part of Boyer's Dictionary:—ROUX, SSE. What is a *learner* to make of this? Then take our adjective SWEET; and you find in the French of Boyer, "DOUX, CE." He who *already understands* the language knows, that in these cases the *x* is to be added to the ROUX and the DOUX to make the *masculine*; and that, to make the *feminine*, the *sse* is to be added to the ROUX, and *ce* is to be added to the DOUX; but, how are these things to be known to him, child or man, who is *learning* the language? One more instance. Take the adjective RELIGIEUX; and in Boyer's and other Dictionaries you find it thus, "RELIGIEUX, SE." Here, again, *I know*, that, to form the *masculine*, I must take in the *x*; and that, to form the *feminine*, I must exclude the *x*, and take in the *se*. But how is a learner of language to know this; and how is it possible that it should not do that learner harm rather than good? I have, therefore, in my Dictionary, given only the *bare word*; that is to say, the word as it is found and referred to in the English part; and, of course, in the French part, the above three words stand thus:

MALIN, *adj.* malicious, malignant, mischievous.

ROUX, *adj.* red, red-haired, reddish.

DOUX, *adj.* sweet, mild, gentle, &c.

RELIGIEUX, *adj.* religious, pious, devout, &c.

And now we are to see the use of my TABLE. You find the word MALIN, for instance; you find it to be an *adjective*; you want to know how it forms its *plural* or its *feminine gender*, or both; you turn to the LIST in TABLE III., and there you find that, as to the *plural*, the word follows the FIRST RULE, and merely takes an *s* in addition; and that it is, in the *feminine*, MALIGNE. You proceed in the same manner with regard to ROUX and DOUX. But, when you come to RELIGIEUX, you do not find it in the LIST. It, therefore, follows the RULE: that rule is the SIXTH; and, as the word ends in EUX, you will see that the rule tells you, that, to form the *feminine*, you must change the EUX into ECSE.

And thus you proceed with regard to all other ADJECTIVES; and, you will find, that, at the end of a month of diligent application, you will never again want to look at either RULES or LIST; and I am, from my own experience, convinced, that the method which I

have here provided for the acquiring of this important part of the desired knowledge, will *very greatly shorten* the work of learning French; that it will save to parents many of those pounds which are expended in the teaching of their children that language, and, which is of still more consequence, tend to save them from that cruel mortification which arises from the children *not learning* the language after all.

TABLE IV. relates to the forming of the PLURALS of ENGLISH NOUNS. The RULES and the LIST of IRREGULARS are taken from my own ENGLISH GRAMMAR; and they are so plain and so easily understood, that the French child or grown person must be dull or dilatory indeed, ever to commit a mistake as to this matter, after a month of application; though mistakes enough, with regard to it, are often committed by English *men*, and by some men too who come from *the Universities*; and, if even *they* were just to look over this part of my Grammar, it would not do them any harm.

TABLE V. relates to ENGLISH ADJECTIVES; that is to say, to the changes in their endings for the purpose of denoting *the degrees of comparison*; for they vary not to denote either NUMBER or GENDER. This matter (coming also from my English Grammar) the learner will find so plainly stated as to make this part of his task a thing not to cost him above sixty hours in the whole.

TABLE VI. ENGLISH VERBS. This TABLE contains the rules for changing the endings of our VERBS, and also a complete LIST of our IRREGULAR VERBS. The matter is taken from my *English Grammar*; and I venture to say, that any foreigner of ordinary capacity will master the whole thing in the space of ten days; and, great is the shame, that we so often see Englishmen, and *Gentlemen* too, who write as if they had never seen, or heard, any thing about the matter; a matter so *easily* understood, and so essential to guard them against committing vulgar and really disgraceful errors.

Such are the uses of these TABLES, which, I verily believe, will do more, if properly attended to, in teaching FRENCH to ENGLISH people, and ENGLISH to FRENCH people, than all that is to be found in all the other INTRODUCTIONS TO DICTIONARIES that are in existence. The recurrence to these TABLES, which will, at first, be necessarily very frequent, will daily become less and less necessary; and, at the end of a very short time, the reader will have the whole matter in his mind, will trouble himself no more about the TABLES, and will find, that he has made a considerable progress in the learning of the language. In conclusion, let the learner be duly warned against the danger of supposing, that a foreign language is to be learned without labour; that it is a thing to be overcome by saucy looks or loud talk. It is a valuable thing: not only a great intellectual accomplishment and ornament, but a really *valuable acquisition*. Not so valuable as that obtained by a seven years' apprenticeship to a shoemaker, tailor, or carpenter: but, still, a thing of real value as a means of obtaining an honest livelihood. But, then, the language must be really learned; not learned a little bit. If "a *little* learning be a dangerous thing," in other cases, it is still more dangerous in this case: to have a mere *smattering* of French in the one case, or of English in the other case, is not only useless, but a great deal worse; giving nothing but conceit, false pretensions, exciting the contempt of observers, producing mortification in friends, and inflicting cruel disappointment on parents. To young English people I particularly address myself; and exhort them, if they undertake the task of learning French, to labour at it assiduously; to attend well to what I have said in my Introduction to my FRENCH GRAMMAR; to recollect that every hour of labour which they now bestow will be productive of fruit to be enjoyed to the

last hour of their lives; to bear in mind, that, if they once acquire the habit of labour now, that habit will stick by them; and, above all things, to bear in mind, that, if they let slip this season for labour, it will never return.

With this advice to those who are to use the book, I send the book itself to the press out of that very room in which Dr. JOHNSON compiled his Dictionary; not however without observing, that in the *French assistance* which I have had in this compilation and which assistance has been very great, I have, I believe, had as sound judgment and as great learning as were possible to be found either in England or in France.

TABLE II.

FRENCH NOUNS.

RULES FOR FORMING THE PLURAL OF NOUNS.

FIRST RULE.—In French, as well as in English, the plural of nouns is formed by the adding of an *s* to the singular; as, *le chien*, the dog, *les chiens*, the dogs.

SECOND RULE.—Nouns ending in *au*, *eau*, *eu*, *ou*, generally form their plural by taking an *x* instead of an *s*; as, *un chapeau*, a hat, *deux chapeaux*, two hats. I have said generally, because some of them take an *s* in the plural; as, *un clou*, a nail, *des clous*, some nails. These exceptions will be found in the next table.

THIRD RULE.—Nouns ending in *al* and *ail* change these letters into *aux* to form their plural; as, *un cheval*, a horse, *des chevaux*, some horses; *le travail*, the work, *les travaux*, the works.

The following nouns are exceptions to the above rules, and form their plural by the taking of an *s* in the singular.

Singular.	Plural.
attirail, m.	attirails.
bal, m.	bals.
cal, m.	cals.
camail, m.	camails.
carnaval, m.	carnavals.
clou, m.	clous.
détail, m.	détails.
épouventail,	épouventails.
évantail, m.	évantails.
filou, m.	filous.
fou, m.	fous.
gouvernail, m.	gouvernails.
loup-garou, m.	loups-garous.
mail, m.	mails.
matou, m.	matous.
pal, m.	pals.
poitrail, m.	poitrails.
portail, m.	portails.
régail, m.	régals.
sérail, m.	sérails.
trou, m.	trous.
verrou, m.	verrous.

The four following nouns are subjected to no rule with regard to their plural.

Singular.	Plural.
ail, m.	aulx.
ciel, m.	cieux.
œil, m.	yeux.
universel, m.	universaux.

TABLE III.

FRENCH ADJECTIVES.

RULES FOR FORMING THE PLURALS AND THE FEMININES OF FRENCH ADJECTIVES.

RULES FOR THE PLURAL OF ADJECTIVES.

FIRST RULE.—Adjectives form their plurals from their singulars by taking on *s* in addition, in the same manner that nouns do.

SECOND RULE.—Adjectives ending in *al* in the singular, change these two letters into *aux*; as *égal*, *général*, which are *égaux*, *généraux*, for the masculine plural.

RULES FOR FORMING THE FEMININES OF FRENCH ADJECTIVES.

THE feminine form is given to the adjective by making some addition or change in the ending of it; as, *petit*, little, *bas*, low, which make in the feminine *petite*, *basse*. Our rules, therefore, must be founded on the ending of the primitive adjective; and they are as follows.

FIRST RULE.—All adjectives that end with an *e* mute are of both genders. They do not change their form on account of gender; as, *un homme sage*, *une femme sage*, a wise man, a wise woman.

SECOND RULE.—Generally speaking, the other adjectives only take an *e* mute in addition, to form their feminine; as, *impertinent*, *poli*, which are in the feminine, *impertinente*, *polie*. And observe, this is invariably the case with all adjectives ending with vowels; except *favori*, which makes *favorite* in the feminine.

THIRD RULE.—Adjectives ending in *f* change the *f* into *ve*; as *positif*, *bref*, which are in the feminine *positive*, *brève*.

FOURTH RULE.—Adjectives ending in *n*, with an *o* or *ie* before the *n*, take *ne* in addition; as, *bon*, *ancien*, which are in the feminine *bonne*, *ancienne*. But, if there be not an *o* or *ie* before the *n*, the adjectives ending in *n* follow the second rule; that is to say, they take an *e* mute in addition; as, *fin*, *vain*, which are in the feminine, *fine*, *vaine*.

FIFTH RULE.—Adjectives ending in *l*, with *e*, *o*, *u*, or *ei*, *ie*, before it, take *le* in addition; as, *cruel*, *vieil*, *officiel*, *fol*, *éternel*, which are in the feminine, *cruelle*, *vieille*, *officielle*, *folle*, *éternelle*. But if the final *l* be not preceded by one of these vowels, or by *ei*, *ie*, the adjectives ending in *l* follow the general rule, and simply take an *e* mute in addition; as, *futill*, *futill*. One exception there is, however, in *gentil*, which makes *gentille*.

SIXTH RULE.—Adjectives ending in *eur* or *eux* change them into *euse*; as, *moqueur*, *religieux*, which are in the feminine, *moqueuse*, *religieuse*.

A LIST

Of all those adjectives which are an exception to the rules laid down, or, which are subjected to no rule at all.

N.B. That the words marked with * are both adjectives and nouns; and that where you find a blank in the column, the word, in that respect, follows the general rule.

TABLE IV. ENGLISH NOUNS.

RULES FOR FORMING THE PLURAL OF ENGLISH NOUNS, WITH A LIST OF THE IRREGULAR NOUNS.

THE singular is the original word ; and, in general, the plural is formed by adding an *s* to the singular ; as, *dog, dogs*. But, though the greater part of our nouns form their plurals from the singular in this simple manner, there are many which do not ; while there are some nouns which have no plural number at all, and some which have no singular. Therefore, considering the above to be the FIRST RULE, I shall add other rules with regard to the Nouns which do not follow that rule.

THE SECOND RULE.—Nouns, the singular numbers of which end in *ch, sh, s, or x*, require *es* to be added in order to form their plural number ; as, *church, churches ; brush, brushes ; lass, lasses ; fox, foxes*.

THE THIRD RULE is, that nouns which end in *y*, when the *y* has a consonant coming immediately before it, changes the *y* into *ies* in forming their plurals ; as, *quantity, quantities*. But, you must mind, that if the *y* be not immediately preceded by a consonant, the words follow the first rule, and take only an *s* in addition to their singular ; as, *day, days*. I am the more anxious to guard you against error as to this matter, because it is very common to see men of high rank and profession writing *vallies, vol-lies, correspondencies, conveniencies*, and the like, and yet all these are erroneous. *Correspondence* and *inconvenience* should have simply an *s* ; for they end in *e*, and not in *y*.

THE FOURTH RULE is, that nouns which end in a single *f*, or in *fe*, form the plural by changing *f*, or *fe*, into *ves* ; as, *loaf, loaves ; wife, wives*. But, this rule has exceptions in the following words, which follow the first rule : *dwarf, mischief, handkerchief, chief, relief, grief*. The two last are seldom used in the plural number ; but, as they sometimes are, I have included them.

THE FIFTH RULE is, that the following nouns have their plural in *en* : *man, men ; woman, women ; ox, oxen ; child, children*. And *brethren* is used sometimes as the plural of *brother*.

THE SIXTH RULE is, that all which nature, or art, or habit, has made plural, have no singular ; as, *ashes, annals, bellows, bowels, thanks, breeches, entrails, lungs, scissors, snuffers, longs, wages*, and some others.

There are also some nouns which have no plural, such as those which express the quali-

ties, or propensities, or feelings, of the mind or heart ; as, *honesty, meekness, compassion*. There are, further, several names of herbs, metals, minerals, liquids, and of fleshy substances, which have no plurals ; to which may be added the names of almost all sorts of grain. There are exceptions here ; for, while *wheat* has no plural, *oats* have seldom any singular. But all these words, and others which are irregular in a similar way, are of such very common use, that you will hardly ever make a mistake in applying them ; for I will not suppose it possible to fall into either the company or the language of those persons who talk, and even write, about *bar-leys, wheats, clovers, flours, grasses, and malts*.

There remain to be noticed, however, some words, which are too irregular in the forming of their plurals to be brought under any distinct head even of irregularity. I will, therefore, insert these as they are used in both numbers.

Singular.	Plural.
die,	dice.
mouse,	mice.
louse,	lice.
deer,	deer.
goose,	geese.
penny,	pence.
tooth,	teeth.
foot,	feet.

TABLE V. ENGLISH ADJECTIVES.

OF THE CHANGING OF THE FORM OF ENGLISH ADJECTIVES.

THE adjectives have no changes to express number, gender or case ; but, they have changes to express *degrees of comparison*. As adjectives describe the qualities and properties of nouns, and as these may be possessed in a degree higher in one case than in another, the adjectives have degrees of comparison ; that is to say, changes in their endings, to suit these varying circumstances. A tree may be *high*, but another may be *higher*, and a third may be the *highest*. Adjectives have, then, these three degrees : the first degree, or rather, the primitive word, is called the *Positive* ; the second, the *Comparative* ; the third, the *Superlative*. For the forming of these degrees I shall give you *four rules* ; and, if you pay strict attention to these rules, you will need be told very little more about this part of speech.

First Rule. Adjectives in general, which end in a consonant, form their comparative degree by adding *er* to the positive, and form their superlative degree by adding *est* to the positive : as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Rich,	Richer,	Richest.

Second Rule. Adjectives which end in *e*, add, in forming their comparative, only an *r*, and in forming their superlative, *st* : as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Wise,	Wiser,	Wisest.

Third Rule. When the positive ends in *d*, *g*, or *t*, and when these consonants are at the same time preceded by a *single vowel*, the consonant is doubled in forming the comparative and superlative ; as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Red,	Redder,	Reddest.
Big,	Bigger,	Biggest.
Hot,	Hotter,	Hottest.

But, if the *d*, *g*, or *t*, be preceded by another consonant, or by more than one vowel, the final consonant is not doubled in the forming of the two latter degrees : as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Kind,	Kinder,	Kindest.
Neat,	Neater,	Neatest.

Fourth Rule. When the positive ends in *y*, preceded by a consonant, the *y* changes to *ie* in the other degrees.

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Lovely,	Lovelier,	Loveliest.
Pretty,	Prettier,	Prettiest.

There are some adjectives which can be reduced to no rule, and which must be considered as irregular : as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Good,	Better,	Best.
Bad,	Worse,	Worst.
Little,	Less,	Least.
Much,	More,	Most.

Some adjectives can have no degrees of comparison, because their signification admits of no augmentation : as, *all*, *each*, *every*, *any*, *several*, *very*, *some* ; and all the numerical adjectives : as, *one*, *two*, *three* ; *first*, *second*, *third*.

Adjectives which end in *most*, are superlative, and admit of no change : as, *utmost*, *uppermost*.

However, you will observe, that all adjectives which admit of comparison, may form their degrees by the use of the words *more* and *most* : as,

POSITIVE.	COMPARATIVE.	SUPERLATIVE.
Rich,	More rich,	Most rich.
Tender,	More tender,	Most tender.

When the positive contains but *one syllable*, the degrees are usually formed by adding to the positive according to the four rules. When the positive contains *two syllables* it is matter of taste which method you shall use in forming the degrees. The ear is, in this case, the best guide. But, when the positive contains *more than two syllables*, the degrees must be formed by the use of *more* and *most*. We may say *tender* and *tenderest*, *pleasanter* and *pleasantest*, *prettier* and *prettiest* ; but who could tolerate *delicater* and *delicatest* ?

TABLE VI.

ENGLISH VERBS.

RULES FOR CHANGING THE ENDINGS OF ENGLISH VERBS, WITH A LIST OF THE IRREGULAR VERBS.

VERBS are called *regular*, when they have their changes or variations according to a certain rule or manner. Thus : "I *walk*, I *walked* ; I *work*, I *worked*." But, I cannot say, "I *writed*." I must say, "I *wrote*." Now, observe, that we call *regular verbs* all those which end their *past time* of the indicative and their *passive participle* in *ed* ; and, if you now look back at the conjugation of the verb *to work*, you will find that that is a regular verb. Indeed, this is the case with almost all our verbs. But, there are some little *irregularities* even here, and they must be very well attended to, because a want of attention to them leads to very great errors even as to spelling.

These little irregularities I shall notice under five separate heads ; and, if you should forget, at any time, what has been said on the subject, a reference to these will, in a moment, set you right.—I. The verb *to work* is *perfectly regular*, for it, has *ed* added to it, in order to form the *past time*, and also in order to form the *passive participle*. It is the same with the verbs *to walk*, *to turn*, *to abandon*, and numerous others. But, if the *infinitive*, that is to say, the primitive or original word, end in *e*, then *d* only is added, in the *past time* and *participle*, and *st* instead of *ed* after *Thou* : as, in the case of *to move*, which becomes *moved* and *movest*. You have seen, also, in the case of the verb *to work*, that we add only an *s* to form the third person singular of the present of the indicative : *he works*. But if the infinitive end in *h*, *s*, *x*, or *z*, then *es* must be added ; as, *to wish*, *he wishes* ; *to toss*, *he tosses* ; *to box*, *he boxes* ; *to buzz*, *he buzzes*.—II. When the infinitive ends in *y*, and when that *y* has a *consonant immediately before* it, the *y* is changed into *ie* to form the third person singular of the present of the indicative : as, *to reply*, *he replies*. But, (and I beg you to mark it well,) if the ending *y* have a *vowel immediately before* it, the verb follows the general rule, in the formation of the third person singular of the present of the indicative : as, *to delay*, *he delays* ; and not *he delaies*. It is the same in the second person singular : as, *to reply*, *thou repliest* ; *to delay*, *thou delayest*.—III. When the infinitive ends in *y*, with a *consonant immediately before* it, the *past time* of the indicative and the *passive participle* are formed by using an *i* instead of the *y* ; as, *to reply*, *he replied* ; *to deny*, *it was denied*. But, if the *y* be preceded by a *vowel*, *ed* is added to the *y* in the usual manner : as, *to delay*, *he delayed*.—IV. The *active participle*, which always ends in *ing*, is, in general, formed by simply adding the *ing* to the infinitive : as, *to work*, *working* ; *to*

talk, talking. But, if the infinitive ends in a single *e*, the *e* is dropped: as to *move, moving*. The verb *to be* is an exception to this; but, then that is an *irregular verb*. It is when the infinitive ends in a *single e*, mind; for, if the *e* be double, the general rule is followed: as, to *free, freeing*. When the infinitive ends in *ie*, those letters are changed into *y* in the forming of the active participle; as, to *lie, lying*.—V. When the infinitive ends in a *single consonant*, which has a *single vowel immediately before it*, the final consonant is doubled, not only in forming the active participle, but also in forming the past time of the indicative, and the passive participle; as, to *rap, rapping*; I *rapped*, it was *rapped*. But, observe well, this rule holds good only as to words of *one syllable*; for, if the infinitive of the verb have more than one syllable, the consonant is not doubled *unless the accent be on the last syllable*; and the accent means the main force, or weight, or sound of the voice in pronouncing the word. For instance, in the word to *open*, the accent is on the *first syllable*; and, therefore, we write *opening, opened*. But, when we come to the verb to *refer*, where we find the accent on the last syllable, we write *referring, referred*.

These irregularities, though very necessary to be attended to, do not prevent us from considering the verbs, which are subject to them, as *regular verbs*. The mark of a regular verb, is, that its *past time* and *passive participle* end in *ed*: every verb, which does not answer to this mark, is *irregular*.

There are many of these *irregular verbs*, of which I shall here insert a complete list. All the irregularities (except the little irregularities just mentioned) which it is possible to find in an English verb (the *auxiliary verbs* excepted) are in the *past time* and the *passive participle* only. Therefore, it will be sufficient to give a List, showing, in those two instances, what are the irregularities of each verb: and, in order to render this List convenient, and to shorten the work of referring to it, I shall make it alphabetical. With the past time of the several verbs I shall use the first person singular of the pronoun, in order to make my examples as clear as possible.

It is usual with Grammarians to insert several verbs in their *List of Irregulars* which I have not inserted here. But I have, in the above list, placed every verb in our language which is really irregular. However, I will here subjoin a list of those verbs which are, by some Grammarians, reckoned irregular; and then I will show you, not only that they are not irregular, strictly speaking, but that you ought by all means to use them in a regular form.

LIST OF VERBS WHICH, BY SOME PERSONS, ARE
ERRONEOUSLY DEEMED IRREGULARS.

to swing,	I swung or swang,	swung.
to thrive,	I throve,	thriven.
to throw,	I threw,	thrown.
to thrust,	I thrust,	thrust.
to wax,	I waxed,	waxen.
to weave,	I wove,	woven.
to weep,	I wept,	wept.
to whip,	I whipt,	whipt.

The greater part of these verbs have become irregular by the bad practice of *abbreviating* or *shortening*, in writing. We are always given to cut our words short; and, with very few exceptions, you find people writing *lov'd*, *mov'd*, *walk'd*; instead of *loved*, *moved*, *walked*. They wish to make the *pen* correspond with the *tongue*; but they ought not then to write the word *the* at full length, nor the word *of*, nor

any other little word ; for scarcely ever are these words *fully sounded* in speaking. From *lov'd, mov'd, walked*, it is very easy to slide into *lovt, movt, walkt*. And this has been the case with regard to *curst, dealt, dwelt, leapt, helpt*, and many others in the last-inserted list. It is just as proper to say *jumpt*, as it is to say *leapt*, and just as proper to say *walkt* as either ; and thus we might go on, till the orthography of the whole language were changed. When the love of contraction came to operate on such verbs as *to burst* and *to light*, it found such a clump of consonants already at the end of the words, that it could add none. It could not enable the organs even of English speech to pronounce *burst'd, light'd*. It therefore made really short work of it, and, dropping the last syllable altogether, wrote *burst* and *light* in the past time and passive participle. But is it not more harmonious, as well as more correct, to say, "The bubble is almost *burst*ed," than it is to say, "The bubble is almost *burst*"? And as to *hang*, is it not better to say *hanged* than *hung*? "I will be *hanged* if I do," is a very

common phrase, and is it not better than it would be to say, "I will be *hung* if I do"? Many of these verbs, by being very difficult to contract, have, as in the case of *to hang, to swing*, and the like, reduced the shorteners to the necessity of changing almost all the letters of the words : as, to *dare, durst* : but is it not better to say *I dared* than *I durst*? This habit of contracting or shortening is a very mischievous habit. It leads to the destruction of all propriety in the use of letters ; and instead of a *saving of time*, it produces, by the puzzling that it gives rise to, a great *loss of time*. Hoping that what I have here said will be a warning to you against the cutting of words short, I have only to add, on the subject of *irregular verbs*, that those in the last list are to be used in the regular form, and that the only real irregulars are those of the first list. Nay, I have, after all, left some verbs in the first list, which *may* be used in the regular form : as *past*, which may be, in the participle, *passed*, and with full as much propriety.

PART I.

FRENCH AND ENGLISH.

NOUVEAU DICTIONNAIRE

FRANÇAIS—ANGLAIS.

A

A, *sm.* is the first *letter* in all modern languages. As a word, it is either a verb or a preposition. *Il a de l'argent*, he has money. As a preposition, it takes the grave accent, and generally corresponds to the dative of the Latins: *A moi*, to me: *A Henri*, to Henry. The preposition *à* is often equivalent to the prepositions *AFTER*, *ABOUT*, *WITHIN*, *WITH*, *BY*, *FOR*, *ON*, *FROM*, &c. *Pas à pas*, step by step: *Un à un*, one by one: *A peu de frais*, at little expense: *Il demeure à Chelsea*, he lives at Chelsea: *A quel propos?* to what purpose? *A la fin du mois*, at the end of the month: *Un habit à la Française*, a coat after the French fashion: *Ils allèrent à pied*, they went on foot: *A ou sous peins de la vie*, under pain of death: *De quarante à cinquante livres*, from forty to fifty pounds.

EN, a pronoun, according to the generality of grammarians. It is of both genders and numbers, and applicable to persons and things. It is equivalent to the prepositions OF, FOR, WITH, ON, AT or ABOUT, with their complement, such as, MR, US: THEE, YOU: HIM, HER, IT: THIS, THAT, THESE, THOSE. It may also signify ANY, SOME, NONE: HENCE, THENCE, or FROM this or that place: as, *J'en suis bien aise*, I am glad of it. *J'en suis fâché*, I am sorry for it. *Je m'en réjouis*, I rejoice at it. *C'en est fait de lui!* it is all over with him! *Nous en avons parlé*, we spoke about it. *Nous en avons dit assez sur ce sujet*, we said enough on that subject. *Avez-vous de l'argent?* *J'en ai*, have you any money? I have (some). *A-t-il des amis?* *il n'en a pas*, has he any friends? he has none. *Avez-vous été à la cité?* *J'en viens*, have you been in the city? I have just come thence or from it. *En vouloir à quelqu'un*, to bear one ill-will. We also say, *A qui en voulez-vous?* whom do you wish to speak to? *A qui en avez-vous?* with whom are you angry? *Je m'en vais* or *je m'en vas*, I am going away. *Il s'en retourne en France*, he goes back to France. *Allons-nous-en*, let us go. When joined to some verbs, it totally alters their meaning: *N'en pouvoir plus*; *en imposer*; *en coûter*, and a great many others have a very different meaning from *Ns pouvoir plus*, *imposer*, *coûter*. **EN** is also used in some elliptical sentences, such as, *Il s'en faut de beaucoup*, there is a great deal wanting. *Il ne sait où il en est*, he does not know how to proceed. *Il en tient*, he is caught. *Voulez-vous en être?* will you be of the party? *Cela n'en est pas*, that has nothing to do with it.
